| 8. | Α | 18. | С |
| 9. | D | 19. | D |
| 10. | С | 20. | В |

SECTION B

General Principles of Marking

- The answers given in this marking scheme are 'suggestions' only. Other relevant answers will also Ι. be accepted.
- Where the number of points required is specified in a question, markers will mark the first listed 2. points up to the number required, and cross out other points as 'excess'.
- The general guidelines for points which are awarded 2 marks each are as follows: 3.
 - 0 mark irrelevant or ambiguous answers
 - I mark mention of key concept or words
 - 2 marks briefly explained concept

QUESTION 1

Elements:

- mission and business objectives -
- form of ownership -
- operations management
- marketing management
- financial management
- human resource management
- contingency actions

(1 mark for each relevant element, max. 4 marks)

| 2 1. | D |
|-------------|---|
| 22. | С |
| 23. | B |
| 24. | С |
| 25. | С |
| 26. | В |
| 27. | С |
| 28. | В |

Marks

1 marks

QUESTION 2

External factors:

- political/legal: government policies about licensing, rules and regulations
- economic: economic growth, income level and purchasing power
- socio-cultural: cultural values, lifestyle
- technological: technological level of café operation, IT applications
- competitive: operation of other cafés and competition in the industry

(2 marks for each relevant factor, max. 6 marks)

QUESTION 3

Criteria:

- franchisor's reputation
- restrictions and obligations
- initial joining fee and royalty
- support and assistance offered, e.g. promotion and training
- franchisor's positioning and strategies match own expectation and desire
- (2 marks for each relevant criterion, max. 4 marks)

QUESTION 4

(i)

Types:

- shares
- bonds
- commercial papers or other notes
- derivatives, e.g. futures, warrants and options
- funds

Factors:

_

(1 mark for each relevant type, max. 3 marks)

- (ii)
- expected return, e.g. dividend or coupon rate of the financial product(s) _
- risk-bearing ability, e.g. ability to suffer capital loss
- liquidity of the financial product(s) ____
- time and effort involved in monitoring the investment -
- (2 marks for each relevant factor, max. 4 marks)

Paper 2A **Accounting Module**

General Principles of Marking Descriptive/Discussion Questions

- Where the number of points required is specified in a question, mark the first listed points up to the 1. number required, and cross out other points as 'excess'.
- The answers given in this marking scheme are 'suggestions' only. Other relevant answers will also 2. be accepted.

QUESTION 1

| (-) | | |
|-----|-------------------------------------|---------|
| (a) | Purchase cost (800 000 × 80%) | 640 000 |
| | Legal fees related to the purchase | 5 200 |
| | Machine installation and adaptation | 7 300 |
| | Testing | 6 500 |
| | Icsung | 659 000 |

Reducing balance method **(i)** (b)

- Advantage: (ii)
 - even allocation of total fixed asset usage costs (depreciation and maintenance)
 - appropriate matching of cost with benefits derived _

QUESTION 2

| % Balance b/f46 980 408 530Purchases ledger control18 410 28 070% %% Credit sales408 530 408 530Returns inwards28 070 % 28 070% % %1 Minority balance c/f8 000 8 000Cash and cheques received Discounts allowed (23 027 - 900)22 127 1 1 Allowance to customer19 100 % 30 130addebts written off30 1301 35 0231 | Y - - - | | Sales ledger | control | | |

QUESTION 3 (Cont'd) <u>Workings</u>

Lan Yan Manufacturin Manufacturing account for the year e

Direct materials Beginning inventory Add: Purchases

Less: Fire Loss

Less: Closing inventory Direct labour Royalties Prime cost Factory overheads Rent and electricity Depreciation of plant and machinery Factory manager's salary

Beginning inventory of work in progress Add:

Less: Closing inventory of work in progress Production cost of finished goods Mark up (10%) Transfer price of manufactured goods

QUESTION 4

(b)

- (a) Advantages: accuracy - lower chance of making errors as data is entered once only instead of _ twice or three times as in a manual system; automatic calculations, e.g. totals, averages
 - speed built-in databases of customers and stock records help speed up data entries
 - availability of information can track orders, prepare regional sales summaries _ and forecasts
 - automatic checking computerised system may check data against information
 - easy backup of records

(2 marks for each relevant advantage, max. 4 marks)

Types of errors:

- error of complete omission
- error of commission
- error of complete reversal
- error of original entries

(1 mark for each relevant type, max. 4 marks)

frame should be accepted as it is higher than the cost of \$8.3, at which the firm will make neither a loss nor a gain.

Marks

(2)

QUESTION 7 (Cont'd)

(d)

- Other factors:
 - Other customers may request the lower price charged and the current buyers may ask for the same special offer in future.
 - The firm should be sure they can meet the rush order with premium quality, or the reputation of the firm will be impaired.
 - The competitive state of the market should be considered. The firm may not be able to afford to lose potential customers.
 - There may be limiting factors which will affect the completion of the order.
 - Legal/social implications in relation to the banned materials should be considered.

(2 marks for each relevant factor, max. 4 marks)

Marks

Total: 20 marks

QUESTION 8

(a) (i)

- Net profit for the year vs net increase in cash and bank balances for the year:
- particular trading period with adjustments of accruals and prepayments.
- Cash and bank balances represent the amount of cash in hand and on demand (net of cash inflows and outflows).
- The business makes profit by converting cash into assets like accounts receivables, inventories, investment, etc. and then converting such assets back into cash.
- A business wants to get hold of cash in the shortest possible time but to keep the least amount of cash in hand so as to increase the number of trading cycles and hence the trading profits.
- Bank balance in the cash book vs the bank statement balance as at 31 December max. 3 (ii) 20X6:
 - cash and cheques deposited into the bank account, and credits bank charges and cheques drawn on payees.
 - view of the bank, in that payments are debited and receipts are credited.
 - The balance in the bank statement rarely agrees with the cash book balance of the same date. The discrepancy may arise from:
 - presented to the bank for payment, deposits made by the company not yet credited by the bank
 - errors made by the bank or errors present in the cash book

(b)

Gearing ratio: Alternative 1 1500/(5100+1800) = 21.74%

Alternative 2 (1500+1800)/(5100+1800) = 47.83%

Alternative 3 (1500+1440)/(5100+1440) = 44.95%

(c)

Earnings per share: Alternative 1 (3600-180)/300 = \$11.4 per share

Alternative 2 (3600-144-180)/200 = \$16.38 per share

Alternative 3 (3600-120-180)/200 = \$16.5 per share Marks

max. 3 Net profit for the year is arrived at matching all expenses and revenues of a-

The cash book makes records from the company's point of view. It debits all

The transactions recorded in the bank statement are shown from the point of

items arising from time differences e.g. cheques issued to suppliers not yet

(6)

(3)

QUESTION 8 (Cont'd)

(d)

- Gearing position:
 - Capital gearing depicts the relationship between equity capital and fixed-interest loan capital (including preference share capital).
 - Among the three alternatives, Alternative 1 is less geared (only 21.74% capital was loan capital) than that of Alternatives 2 and 3 (more than 40% capital was loan capital).
 - Interest has to be paid half-yearly under Alternative 2 and Alternative 3 requires an annual repayment of 20% of the liability.
 - Overall, shareholders bear lower risk under Alternative 1. _

Return to shareholders:

- Under all three alternatives, the return to long-term capital employed included preference dividend and ordinary dividend.
- Both Alternatives 2 and 3 impose interest burden on the company and can weaken the company's profitability and liquidity position. Shareholders may suffer if the estimated profit is not attained.
- Based on the earnings per share, ordinary shareholders will benefit from the highly geared position under Alternatives 2 and 3.

(e)

- Non-financial factors:
 - Responses of potential investors in the market for issue of ordinary shares or debentures.
- Stakeholders' support for the expansion (such as feedback from the workforce, environmental issues, possible changes in the market share, etc.) (1 mark for each relevant factor, max. 2 marks)

Paper 2B **Business Management Module**

General Principles of Marking

- be accepted.
- number required, and cross out other points as 'excess'.
- Essay questions require a discussion of the different aspects involved and a maximum mark is set for each point given in the marking scheme.
- The general guidelines for points which are awarded 1-4 marks each are as follows:
 - 0 mark irrelevant or ambiguous answers
 - 1 mark relevant phrases containing key words that answer the question

 - scenario

QUESTION 1

Reasons:

- identify valuable customers
- provide customized products or services
- offer cross-selling and/or up-selling
- establish long-term relationship with customers so as to increase potential long-term sales
- (2 mark for each relevant reason, max. 6 marks)

QUESTION 2

Ways:

- (e.g. accommodation arrangements and scenery spots to be visited)
- right to safety: avoid high-risk / dangerous activities
- right to choose: provide a wide choice of tours
- (2 marks for each relevant way, max. 6 marks)

The answers given in this marking scheme are 'suggestions' only. Other relevant answers will also

Where the number of points required is specified in a question, mark the first listed points up to the

11/2 or 2 marks - a relevant point or answer with a brief explanation of the concept/key words stated 3-4 marks - a relevant point or answer elaborated with illustration of how it is related to the given

Marks

6 marks

Marks

right to be informed: provide sufficient information to the consumers about the itinerary

right to be heard: prompt response to customers' enquiries and complaints about the tour

6 marks

QUESTION 3

Methods:

- buy/sell standardized FOREX futures contracts
- buy call or put foreign currency options
- enter into agreements on foreign currency swaps
- (2 marks for each relevant arrangement, max. 4 marks)

QUESTION 4

Ways:

- establish a workable credit policy to screen customers before granting credit
- establish a written policy and let each customer know in advance the company's credit terms
- establish practice of sending invoices for payment promptly
- establish immediate follow-up measures for those accounts that are overdue
- (2 marks for each relevant way, max. 4 marks)

QUESTION 5

Disadvantages:

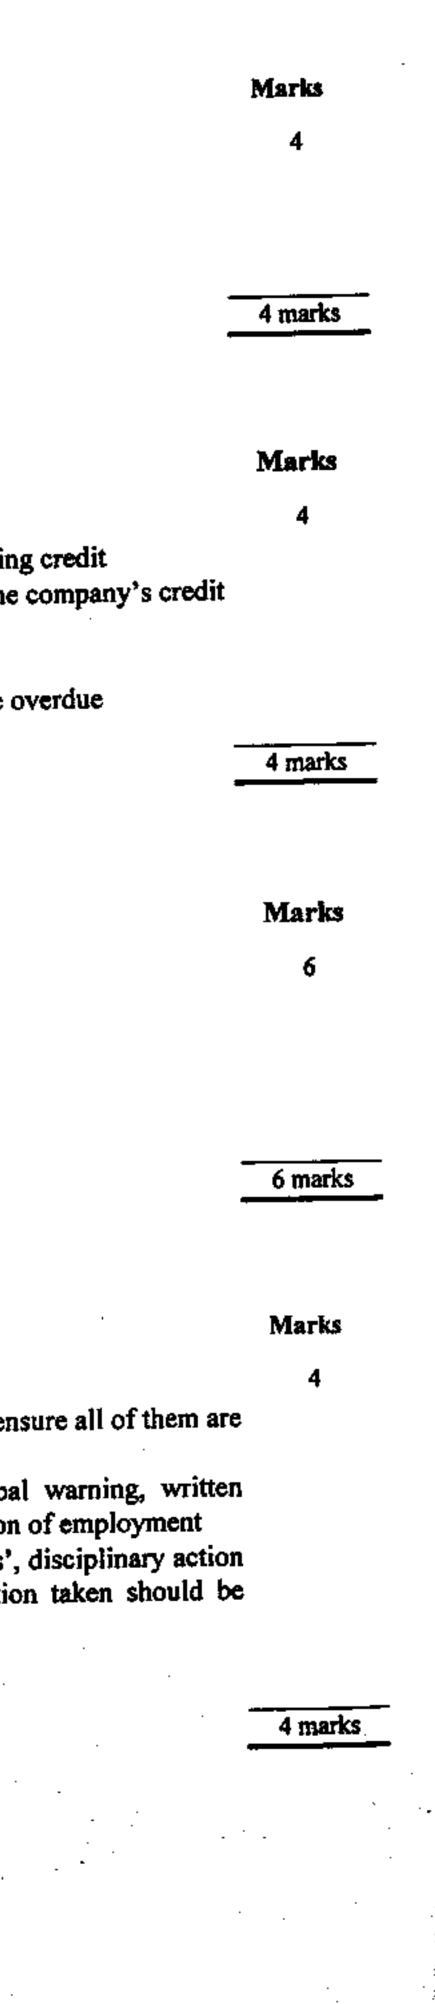

- high administrative cost
- time-consuming
- subject to personal bias
- only a snapshot of the candidate's performance
- (2 marks for each relevant disadvantage, max. 6 marks)

QUESTION 6

Elements:

- communication: explain to staff the mechanics of the system and ensure all of them are duly informed
- progression: disciplinary measures should be graded e.g. verbal warning, written warning, suspension from duties, summary dismissal or termination of employment
- documentation: details such as 'breach of disciplinary regulations', disciplinary action taken, employee's self-defense and validity of disciplinary action taken should be sufficiently recorded and dated
- appeal mechanism: establish clear procedures for appeals

(2 marks for each relevant element, max. 4 marks)

QUESTION 7

| (a) | (i) | Herzberg's dual factor theory: a command and control environment is factors and does not cater for motivators hinder the satisfaction of higher level to sense of achievement, etc. |

Large corporation - Factors comparison and point st methods are sophisticated, of quantitative techniques. They are more complex, costly and time-consuming and are mostly adopted only by large corporations. ing method is simple, semi-analytical, nt be suitable for both. Factors comparison and point methods require the setting up of committees to make precise bs judgment on selecting key jobs as standard and allocate points n to job criteria, etc. Classification or job grading ЭΓ method also requires the setting up of a committee to develop written definitions for each grade of job. Factors comparison and point methods require a lot of discussion and objective more flexible as they do not judgment and take time and involve complicated money to develop. They will administration. Standards not be changed easily once set may be changed easily by up. They are therefore more SMEs with fairly commonly adopted by large homogeneous jobs. corporations. As the factors comparison and The time horizon of job point methods take time and ranking and classification money to develop and more methods is usually short e.g. objective factors are used in one year, as the designs are their development, the systems largely based on tend to be used for longer impressionistic (or even periods of time and they are intuitive) judgment. The therefore more suitable for criteria may be changed large corporations. every year. Therefore the methods are more suitable for most SMEs.
