

## INTRODUCTION

### Situation

You are a member of a local youth club which is planning to do some work for charity. You are attending a discussion arranged by two teenagers who are promoting an international charity project. You are hoping to get some ideas from the discussion about ways to organize such projects in Hong Kong.

The discussion is divided into two parts. In the first part you will hear details of the charity project and in the second part there will be a question-and-answer session. You need to take careful notes on both parts so that later you can report back to the other members of your youth club.

### Part I

In this part, you will hear details of the charity project.

You will have 5 minutes to familiarize yourself with the note headings for Part I before the discussion begins.

At the end of Part I, you will have 5 minutes to tidy up your answers.

### Part II

In this part, you will hear a question-and-answer session.

You will have 3 minutes to familiarize yourself with the note headings for Part II before the session begins.

At the end of Part II, you will have 10 minutes to tidy up your answers.
